

KRUTAGYA KANERIA

Ahmedabad, Gujarat

 [Leetcode](#)(300+ Solved)

 [Github](#) (60 repos + 72Pr + 900 commit)

 [Linkdin](#)(11k+ followes, 45+ post)

Technical Skills

Programming Languages : Python, C/C++, JAVA, JavaScript, Typescript, SQL(Postgres), HTML/CSS

Frameworks & Libraries: Next.js, React, Redux, Node.js, Express, Socket.io, Tailwind CSS,

Cloud & DevOps : GoogleCloud, Vercel, **Github Actions**, **Jenkins**

Developer Tools : Git, GitHub, Google Cloud, Postman, AWS

Database Management PostgreSQL, MongoDB, Supabase, Atlas

Experience

Backend Developer – Hackathon Finalist (Top 5, 2000+ Teams) ([POSTLINK](#))

May 23 - 2025

Gujarat Vidyapeeth Hackathon | Ahmedabad, Gujarat

Gujarat, India

- Built a full-stack marketplace connecting farmers with consumers; developed REST APIs, JWT authentication, and MongoDB data models
- Applied Agile practices, optimized workflows with CI/CD pipelines, and explored microservice-based architecture for scalability
- Secured 5th place in offline finals among 2000+ teams and earned an invitation to Odoo India HQ for an industry interaction on ERP and enterprise solutions.

Top 4 Finalist – Hack-the-Tank 3.0 Hackathon ([POSTLINK](#)) ([POSTLINK](#))

April 11 - 2025

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat – 2026

Gujarat, India

- Built an AI-native autonomous testimonial generation engine in a 24-hour hackathon for TechUp Labs.
- Developed end-to-end pipeline for AI-driven adaptive interviews, video recording, transcription, emotion analysis, and automated reel generation using FFmpeg.
- Implemented one-click Instagram publishing workflow for generated testimonial reels.
- Achieved Top 4 placement among participating teams by delivering a fully autonomous prompt-to-publishing system.

Projects

HealthSync – Smart Hospital Management Platform

[Deployed in AWS, CI/CD \(Github Action, Jenkins\)](#)

- Developed a full-stack healthcare web app enabling patients to search hospitals, compare services, and book appointments securely.
- Implemented role-based JWT authentication for Patients, Doctors, and Hospital Admins.
- Integrated Stripe for secure file creation fee payments and added a chatbot for medicine-related queries using AI.
- Designed a MongoDB schema to manage doctors, hospitals, facilities, and real-time bed availability.

AgriAuthentic – Farmer-to-Consumer Marketplace with Price Forecasting

- Built a platform connecting farmers and consumers, allowing verified farmers to post crops and track orders.
- Designed a secure backend using JWT for role-based login (Farmer/Consumer).
- Created a custom market price prediction API to guide farmers on optimal crop pricing and timing.
- Implemented product reviews visible only after a successful purchase, enhancing trust and transparency.

Blockchain-based Green Hydrogen Credit Platform

- Built a blockchain + IoT platform to automate certification, tracking, and trading of green hydrogen credits.
- Developed smart contracts and secure wallets to issue, transfer, and retire credits, preventing fraud and double counting.
- Integrated real-time IoT data with blockchain for tamper-proof verification and streamlined regulatory compliance.

Open Socures Contibution ([PR](#), [Issue](#), [Repo_link](#))

- Achieved zero manual monitoring using automated alert trigger and resolution based on reorder thresholds.
- Planned and designing CI/CD pipeline using GitHub Actions for automated build, test, and deployment workflows.
- Led the implementation of a complete inventory & alert lifecycle platform used by laundry workers for stock management.

Certifications

• Microsoft Azure AI Essentials Professional Certificate

• Web Development with Node.js and MongoDB

• Career Essentials in GitHub – Professional Certificate

 Microsoft

 Infosys Springboard

 GitHub & LinkedIn Learning

Education

Rai School of Engineering

August 2024 – June 2028

Bachelor of Technology in Computer Science (CGPA of 9.65/10)

Gujarat, India
